

Why Bloat Guard®?

Bloat can kill quickly. Protect your investment and safely graze high risk pastures with STOCKADE® supplements containing Bloat Guard®.

Bloat Guard® breaks up the froth, allowing gases to be belched out so that cattle can continue to graze in comfort. Bloat Guard® keeps cattle safe from frothy bloat characteristic of lush legume or small grain pastures.

Why Rumensin®?

More weight gain equals more profits. Maximize stocker and heifer growth by making the most of high quality pastures with STOCKADE® Rumensin® supplements.

Rumensin® makes additional energy available to the animal through manipulation of rumen fermentation. Based on research growth trials, it can be

calculated that the additional energy derived from feeding 200 mg of Rumensin® daily to growing calves is equivalent to the energy derived from roughly 1.0 lb of corn. Calves typically gain 0.20 to 0.25 additional pounds per day* as compared to calves receiving no Rumensin®.

**Individual results may vary*

Consistent High Quality

STOCKADE® supplements are made from only high quality ingredients chosen with animal performance in mind. STOCKADE® maintains some of the highest manufacturing standards in the industry and is devoted to product safety and consistency.

Wheat Pasture Mineral with Bloat Guard® POL4.41

#43033 For Further Manufacture of Feed.

Use this medicated premix to create your own custom feed for the prevention of frothy bloat on bloat-producing pastures. Just follow the easy-to-use mixing directions to provide the correct amount of Bloat Guard® for your animals based on body weight. Feed your custom medicated feed during periods of high bloat risk.

Stocker Booster R1200 Mineral

#46736 For Further Manufacture of Feed.

This medicated premix is designed to be mixed with your own feedstuffs to produce a customized medicated feed for your stocker calves and replacement heifers. Just follow the easy-to-use mixing directions to create medicated feeds for purpose of either increased rate of weight gain or the control of coccidiosis. Be sure to read and follow all safety precautions including not allowing equines access to these feeds.

Free Choice Rumensin® 1620 Mineral

#43034 Free Choice Mineral for Growing Cattle.

Provides all the benefits of Rumensin® growth promotion with the convenience of free choice mineral delivery! STOCKADE® Free Choice Rumensin® 1620 Mineral allows you to make the most of high quality pastures by reliably providing replacement heifers and stockers with the salt, minerals and vitamins that they need along with growth promotion without the hassle of mixing and delivering feed. Do not use in pastures containing horses, as Rumensin® can be harmful to equines.

Bloat Guard® Pressed Block

#43032 For Cattle on Legume Pasture.

If you don't want the hassle of mixing and delivering medicated feed, use STOCKADE® Bloat Guard® Pressed Blocks to conveniently deliver Bloat Guard® on a self-fed basis during periods of high risk. These highly palatable blocks act to "spoon feed" Bloat Guard® to your cattle around the clock to keep them optimally protected on bloat-producing pastures. It is important to remove all other sources of salt and minerals while utilizing these blocks.

Rumensin® Pressed Block

#43031 Mineral/Vitamin Block for Growing Cattle.

Get the most out of your stockers and replacement heifers on high quality pastures with these high quality pressed blocks. STOCKADE® Rumensin® Pressed Blocks reliably deliver 100% of NRC required levels of minerals and vitamins in addition to the growth promotion benefits of Rumensin®. These convenient blocks will provide 24/7 supplementation and eliminate the need for mixing and delivering feed. Do not use in pastures containing equines.
